

GROUP SOCIO-ECONOMIC DEVELOPMENT POLICY

Sun International is an internationally recognised gaming and hospitality group that believes in empowering, developing and growing the communities within its surrounding areas. As a responsible corporate citizen we understand the necessity to empower communities in South Africa and therefore, socio-economic development (SED) forms a key component of the group's sustainable business strategy.

As a group we recognise that we have a shared-value obligation to our stakeholders to ensure that SED forms an integral part of our business strategies which assist in achieving our licence conditions, Broad – Based Black Economic Empowerment (B-BBEE), transformation and corporate governance processes. Sun International aims to achieve its SED objectives and our shared-value obligations by ensuring that we:

- make a positive, sustainable and measurable impact on communities within our operational areas;
- invest and empower communities through our core SED focus areas of education, sport, arts and culture;
- through our mutually beneficial and sustainable partnerships the group continues to build and improve relationships with surrounding communities within our operational areas;
- continue to enhance the group's reputation as a responsible and caring corporate citizen; and
- demonstrate responsible behaviour in terms of SED and corporate social investment through:
 - clearly defined engagement processes and procedures by which the group will identify, allocate and manage its sustainable SED initiatives;
 - focusing its funding, first and foremost, on those communities that are directly involved and impacted on by the group's operations;
 - approaching all SED initiatives in a consultative manner through our Community and Stakeholder Engagement (C&SE) processes and where possible facilitate sustainable projects, potentially scalable initiatives and self-sufficiency in communities;
 - attracting social, environmental and economically responsible and qualified entrepreneurs, suppliers, contractors and concessionaires;
 - measuring the effectiveness and sustainability of our SED projects and partnerships against the group's transformation and investment targets as stipulated by the B-BBEE framework and the Gaming Board's social development requirements; and
 - providing feedback and progress reports on SED and C&SE initiatives to Sun International's Sustainability, Risk and Social and Ethics Committees.

Sun International's Socio-Economic Development Policy is aligned to the group's sustainable business strategy and demonstrates its commitment to social upliftment and building sustainable partnerships with communities and stakeholders directly and indirectly affected by our operations.
